

KRYPTON

Kentucky Bluegrass

Description:

KRYPTON (PST-K-10-114) is a new variety that is developed for full sun cool season turf. KRYPTON has improved disease tolerance to leaf spot. In private testing, the variety has good cold and wear tolerance. With its lineage of breeding including the varieties Midnight, Shamrock and Poa sibirica, along with selections from cemeteries in California, the variety has a highly diverse background.

It has increased plant vigor to tolerate a range from 1.25 inch cut and higher. KRYPTON has a darker green color that is similar to the Midnight classification of varieties.

Tests in North Carolina, New Jersey and Oregon have shown that KRYPTON is a top third performer versus other commercially available varieties.

It can be used in sod production, athletic and golf turf, mixed with ryegrasses and fescues for home lawns.

Seed Specification:
New Lawns:
 2 to 3 pounds per 1000 square feet
 or 90 to 135 # per Acre

Overseed:
 1 to 2 pounds per 1000 square feet
 or 45 to 90# per Acre

Dormant Winter Seeding:
 same as above

- + *New and improved*
- + *Good spring green up*
- + *Darker green color*
- + *Good leaf spot tolerance*
- + *Improved wear tolerance*

Turf Features

- Germination Time** - Slower
17 to 28 days is normal in spring and fall with irrigation
- Growth habit** - rhizomes help recovery and sod knitting
- Drought Tolerance** - Good
- Mowing Height** - from 1.25 inch cut to 3 inches or more
- Disease Resistance** - Higher resistance to leaf spot & dollar spot
- Traffic tolerance** - Good
- pH Tolerance**
Ranges from 6.0 to 8.0, Ideally at 6.5
- Texture**
Medium leaf texture and normal vertical growth habit
- Compatibility** - with Kentucky bluegrass, fine fescue or perennial ryegrass, or 5 to 10% in tall fescue mixes
- Color** - Darker green
- Shade tolerance** - Poor
- Salt tolerance** - Poor
- Endophyte enhanced** - No
- Preferred use** - sports fields, golf fairways, sod production, home lawns
