

**PAR 5**  
**Perennial Ryegrass**  
**Blend**

**P**AR 5 perennial ryegrass blend is a great addition to your turf lineup. We put three excellent performing deep green turf type perennial ryegrasses in the blend, making a great combination for turf. PAR 5 turf type perennial ryegrass consists of Rio Vista, Octane, Bonneville, Fusion, Buena Vista or another elite perennial ryegrass variety. These varieties are extremely dark green and dwarf. PAR 5 has shown great performance in trials and overseeding use.

PAR 5 blend is a problem solver for any golf course superintendent or professional turf manager who is looking for a reduction in clippings and maintenance. This makes PAR 5 blend a great turf for golf course fairways, lawns, and athletic areas in full sun. PAR 5 blend has improved resistance to gray leaf spot, brown patch and rust as well as a shorter vertical growth habit.

Performing well in both cool season areas and southern overseeding, PAR 5 can be mowed as low as 3/16" with great results in full maintenance programs. It is also well suited for lawns and turf areas with mowing heights up to 2 inches. Germination time is fast with PAR 5, generally three to ten days with irrigation.

If you are looking for a dark green turf that generates fewer clippings and saves on maintenance throughout the season... use PAR 5 perennial ryegrass blend.

- ◆ *New and high performance*
- ◆ *Fast germinating*
- ◆ *Excellent turf color & quality*
- ◆ *Short mowing ability*
- ◆ *Great for overseeding or permanent turf areas*
- ◆ *Improved versus gray leaf spot*

*Permanent Northern Turf:*  
*New Lawns: 6# per 1000 square feet*  
*Overseed: 3# per 1000 square feet*  
*Sports turf: 10# per 1000 square feet*

*Dormant Southern Overseeding:*  
*Lawns & Fairways: 8-15 # per 1000 square feet*  
*Tees and Greens: 20-35 # per 1000 square feet*
