

Perennial Ryegrass Blend

- *High NTEP performance*
- *Quick establishing*
- *Better traffic tolerance*
- *Gray Leaf Spot Resistance*
- *Endophyte enhanced*

RX perennial ryegrass blend is a great addition to your turf lineup. We put three excellent performing deep green turf type perennial ryegrasses in the blend, making a great combination for turf. Rx perennial ryegrass blend consists of Octane, Rio Vista, Bonneville, Overdrive 5G or other elite perennial ryegrass varieties. These varieties are extremely dark green, dwarf and have gray leaf spot resistance as documented by Rutgers University. Rx perennial ryegrass blend is a problem solver for any professional turf manager who is looking for a reduction in clippings and maintenance. Its endophyte content increases insect resistance and stress tolerance. This makes Rx perennial ryegrass blend a great turf for golf course fairways, lawns, and athletic areas in full sun. Rx perennial ryegrass blend has improved resistance to brown patch, gray leaf spot, and rust as well as a shorter vertical growth habit.

Performing well in cool season areas where ryegrass is permanent turf, Rx perennial ryegrass blend can be mowed at golf fairway height with great results in full maintenance programs. It is also well suited for lawns and commercial or athletic turf areas with mowing heights up to 3 inches. Germination time is fast with Rx perennial ryegrass blend, generally three to ten days with irrigation. The variety components have excellent disease resistance and a shorter and tighter growth habit.

If you are looking for a dark green turf that generates fewer clippings and saves on maintenance throughout the season... use Rx perennial ryegrass blend.

Permanent Northern Turf:
 New Lawns: 6# per 1000 square feet
 Overseed: 3# per 1000 square feet
 Sports turf: 10# per 1000 square feet

Dormant Southern Overseeding:
 Lawns & Fairways: 8-15 # per 1000 square feet
 Tees and Greens: 20-35 # per 1000 square feet

Perennial Ryegrass Blend

- *High NTEP performance*
- *Quick establishing*
- *Better traffic tolerance*
- *Gray Leaf Spot Resistance*
- *Endophyte enhanced*

Turf Features

- Germination Time** - Fast
7 to 10 days is normal in spring and fall with irrigation
- Growth habit** - bunch grass
- Drought Tolerance** - Good
- Mowing Height** - from 1/2 inch daily to 3 inches weekly
- Disease Resistance**
Excellent resistance to gray leaf spot
High resistance to dollar spot and red thread
- Traffic tolerance** - Good
- pH Tolerance**
Ranges from 5.5 to 8.5, Ideally at 6.0 to 6.5
- Texture**
Fine leaf texture and dwarf vertical growth habit
- Compatibility** - with Kentucky bluegrasses and fine fescues, turf type tall fescues or overseeding dormant turf
- Color** - Dark green
- Shade tolerance** - poor to fair - likes full sun
- Salt tolerance** - Good
- Endophyte enhanced** - Yes - helps insect and stress tolerance
- Preferred use** - Home and commercial lawns, sports fields, golf fairways, tees and roughs

Contains at least 2 of these varieties for permanent turf use:
